- 10:30 Second Factor Authentication - Distributed Vetting (Mihaly)
- 10:40 Shibboleth OIDC Extension (Janne)
- 10:50 General discussion
- 11:00 Close

Task 2: Trust & Identity Incubator (T&II)

The GN4-3 WP5 T2 Trust and Identity Incubator (“T&I Incubator”) aims to **develop, foster and mature new ideas in the Trust and Identity** space in Research and Education.

The incubator will investigate **new technologies** that currently **have no place yet** in the services ecosystem of the GEANT project. It will test and experiment with potential new features for existing services.

In addition also **business case development** for potential new services and developments that would **improve data protection and privacy aspects** in services or software are in scope.

Methodology

- Agile, using Scrum like approach
- 4-6 activities in **parallel**
- 6 month cycles, 1 month sprints
- **Sprint demo** for all activities at same time
- For details, see <https://wiki.geant.org/x/XZvZBg>

Activity Team (the A-Team!)

- 1 or 2 'Principle Investigators'(PI) who own the problem
- Scrum master who supports processes (Jule or Michael)
- Support from T&I team as needed, e.g. technical or business development
- Mentor
