

What was the biggest challenge you had in higher education during the pandemic?

timemanagement
rapid scale up of service
communications for users
scaling learning tool use
uncertainty
selfdiscipline
connectivity
internet access
exams and assessment
entrance examinations
educational development
digital skills teaching

What is currently the predominant form of teaching at universities in your country?

Do you plan to coordinate digitalisation in higher education across your organisation?

How do you plan to coordinate digitalisation of higher education on a national level in your country? (Please state your country.)

Build joint national services (Norway)

In Slovenia NREN is not a major player here (regarding HE)

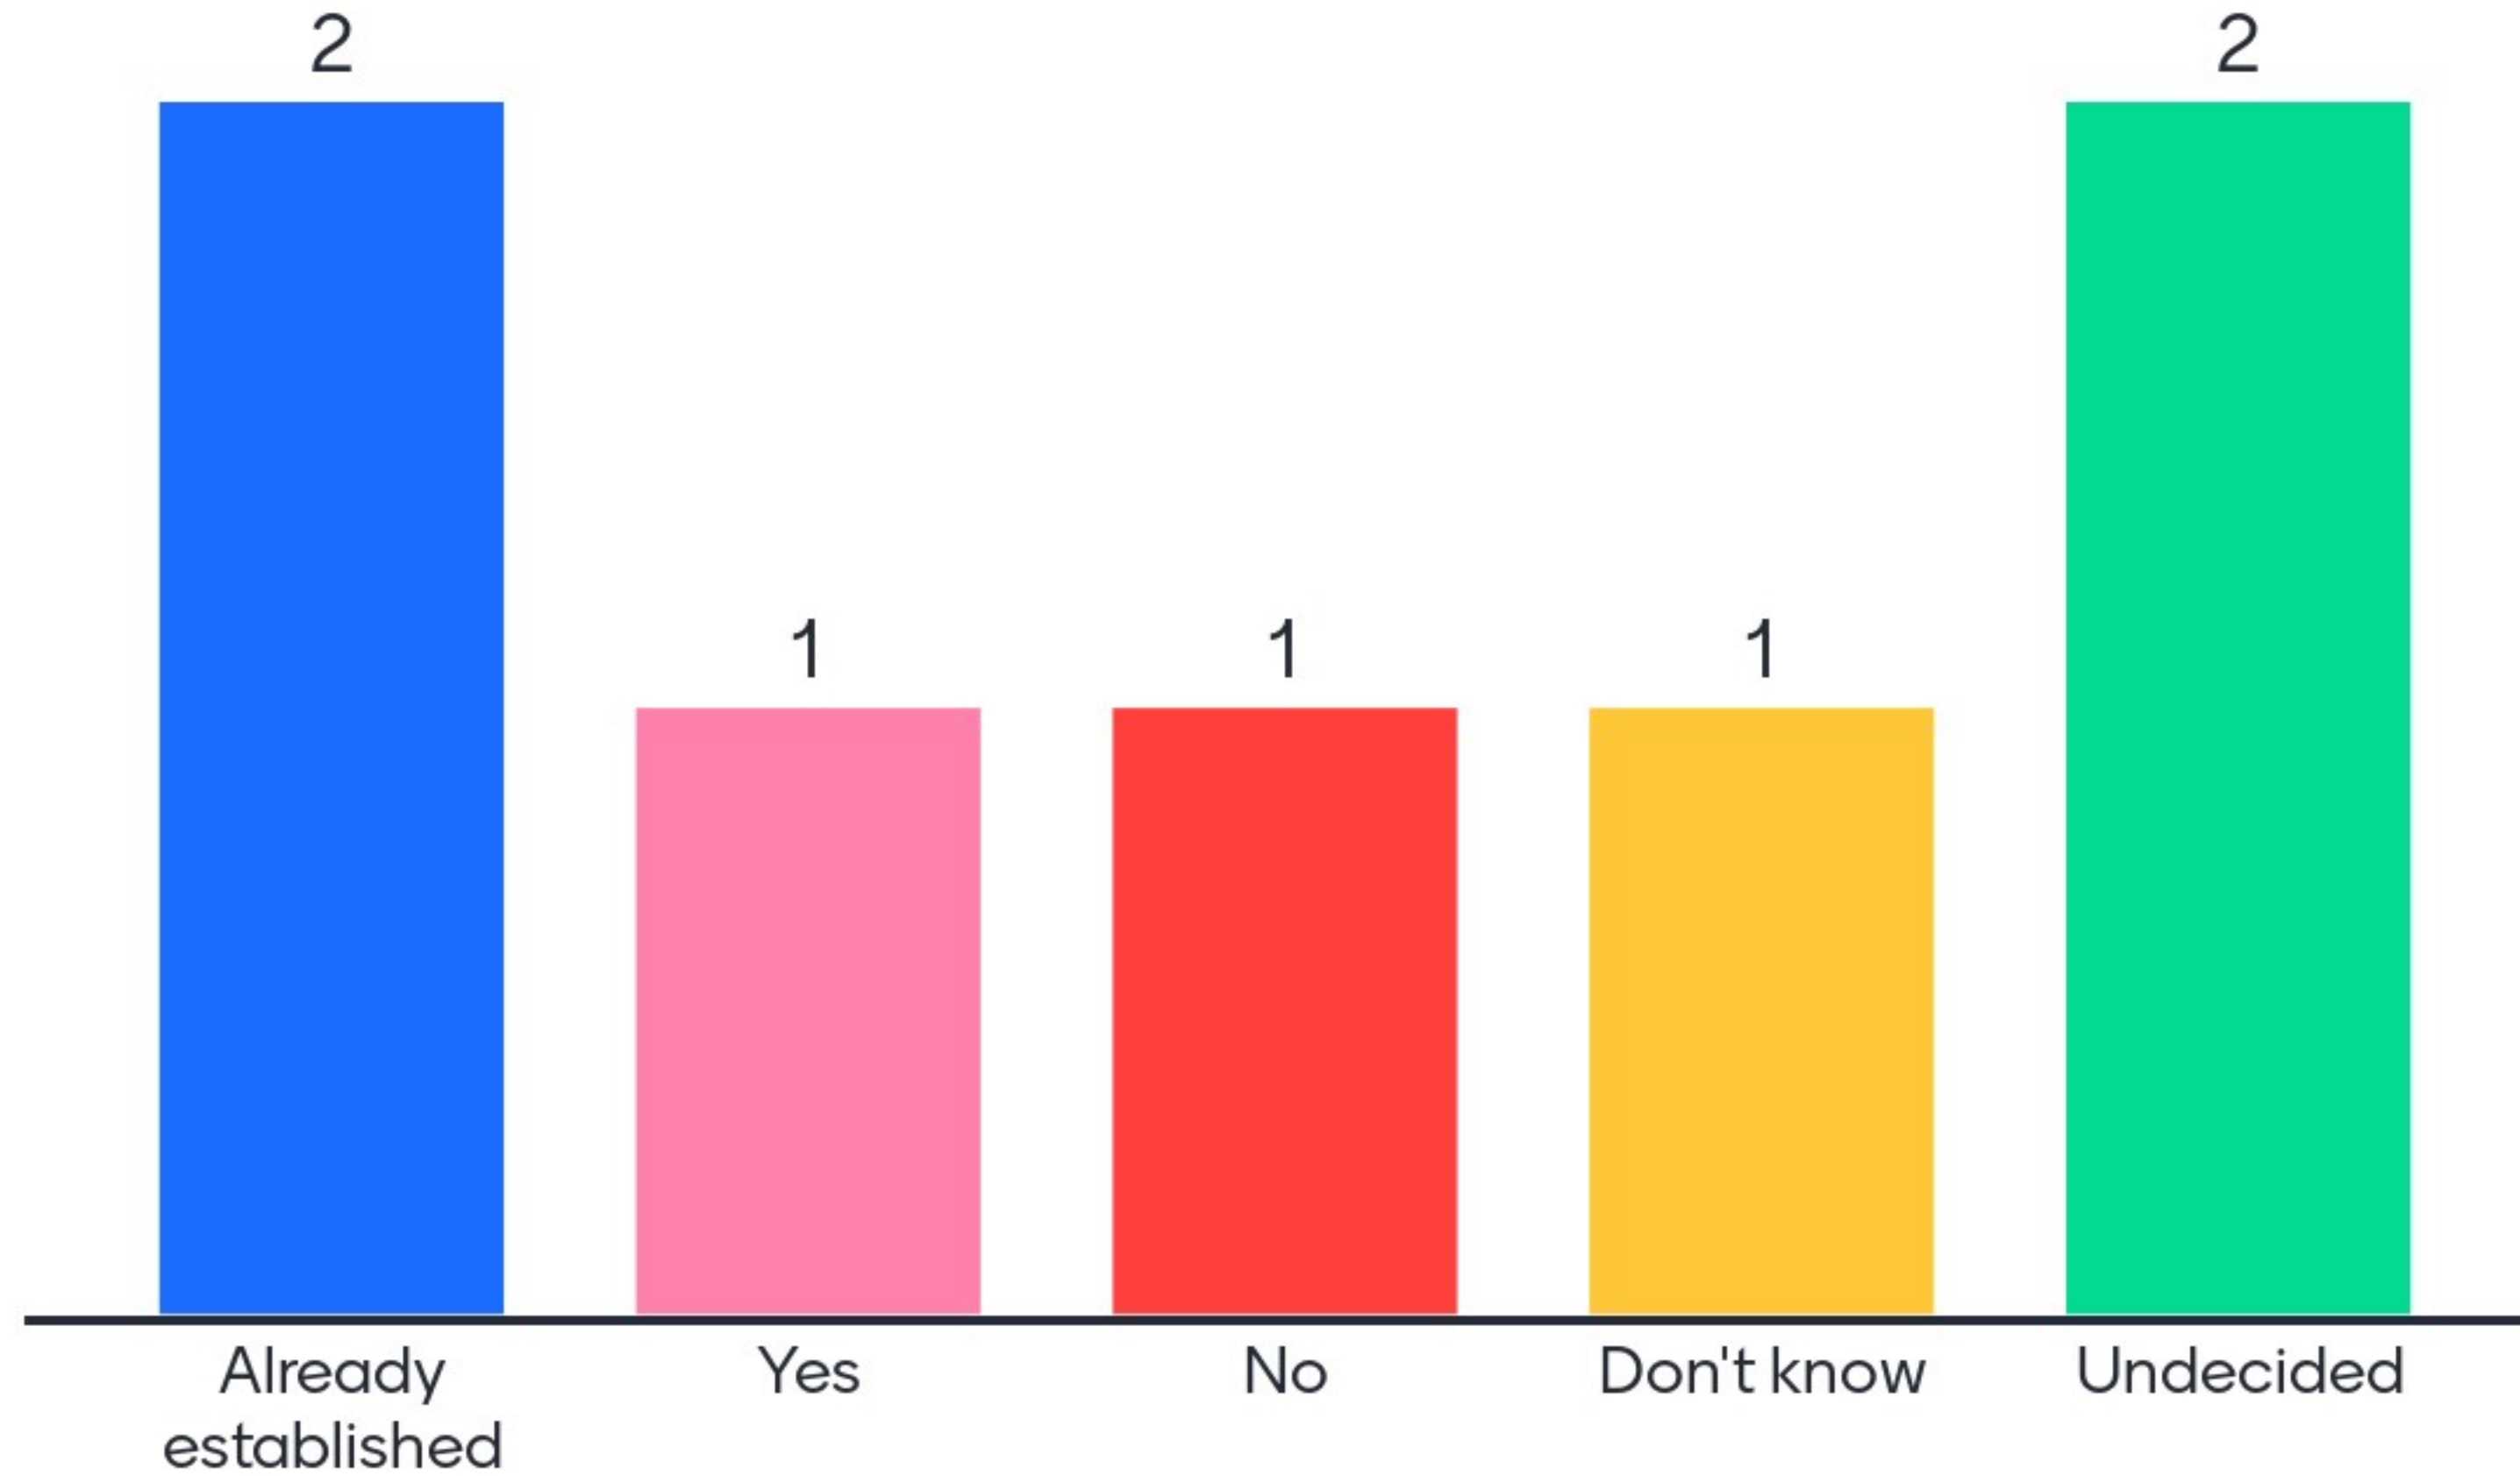

(International) Joint roadmap development with key stakeholders.

Finland - a shared strategy work among HE institutions. Joint efforts for digital entrance examinations.

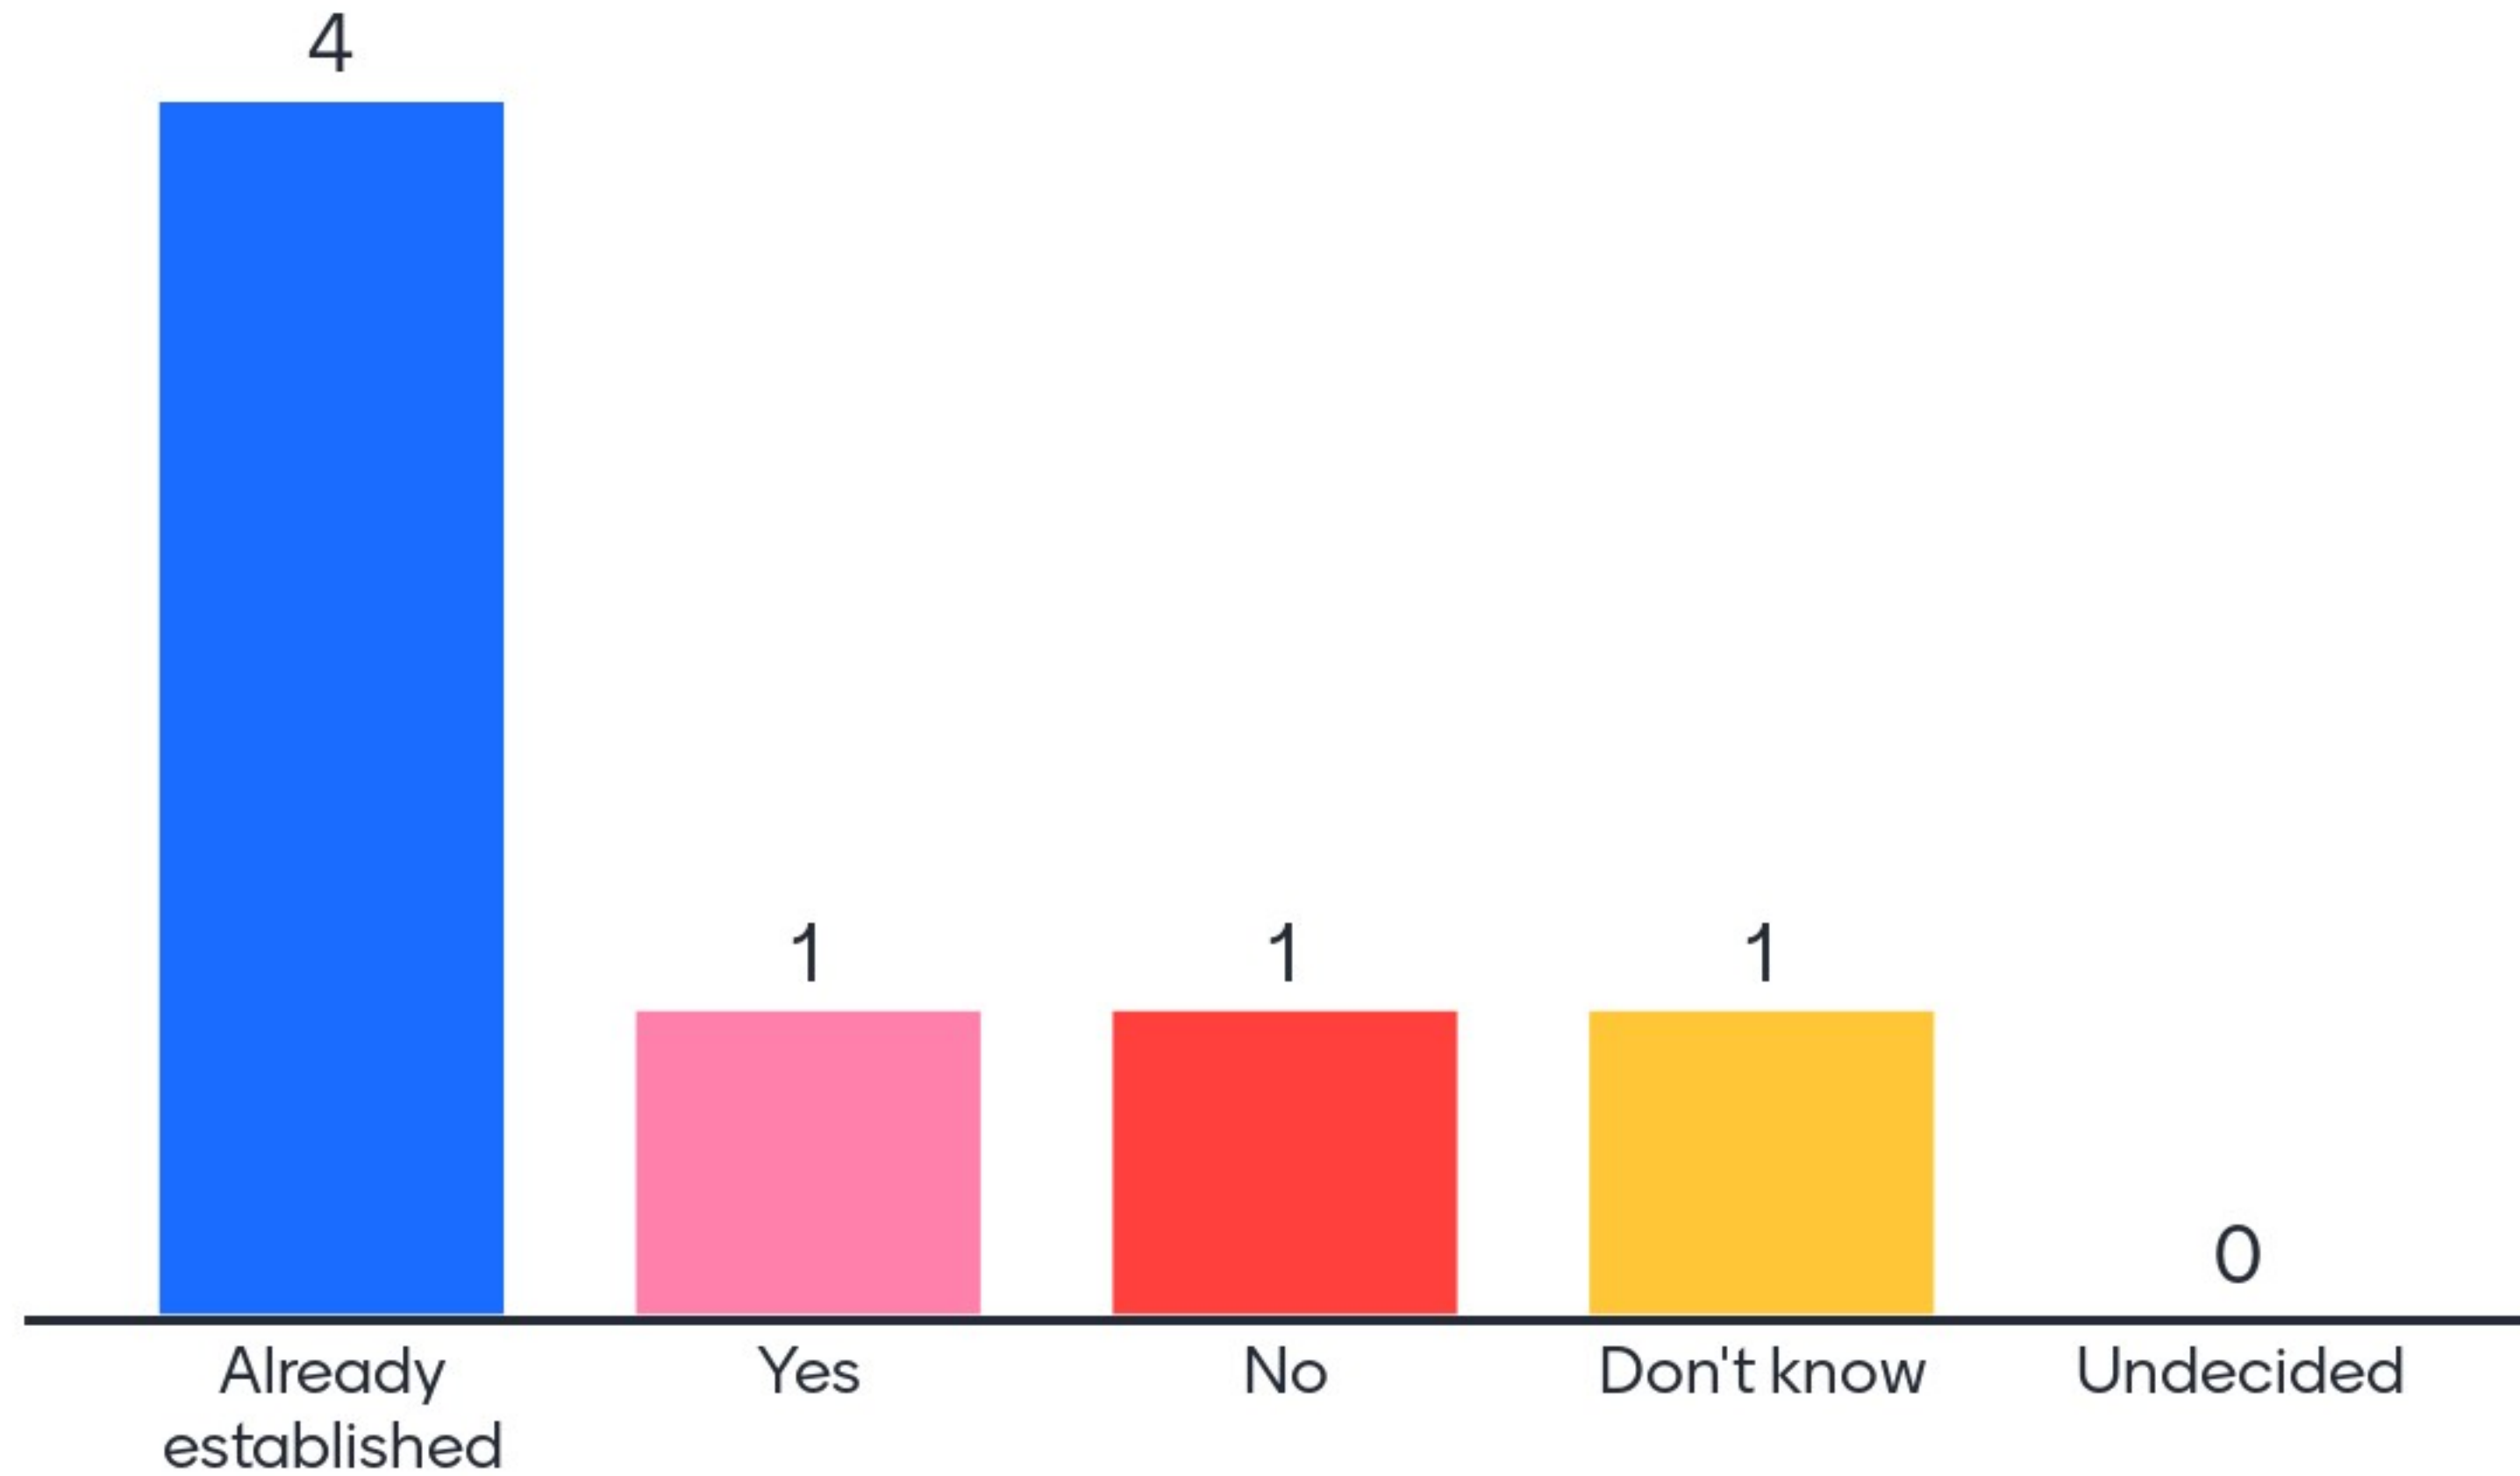

join pilots in different universities (Greece)

Some such centres are already in place (Croatia) No new plans at the moment

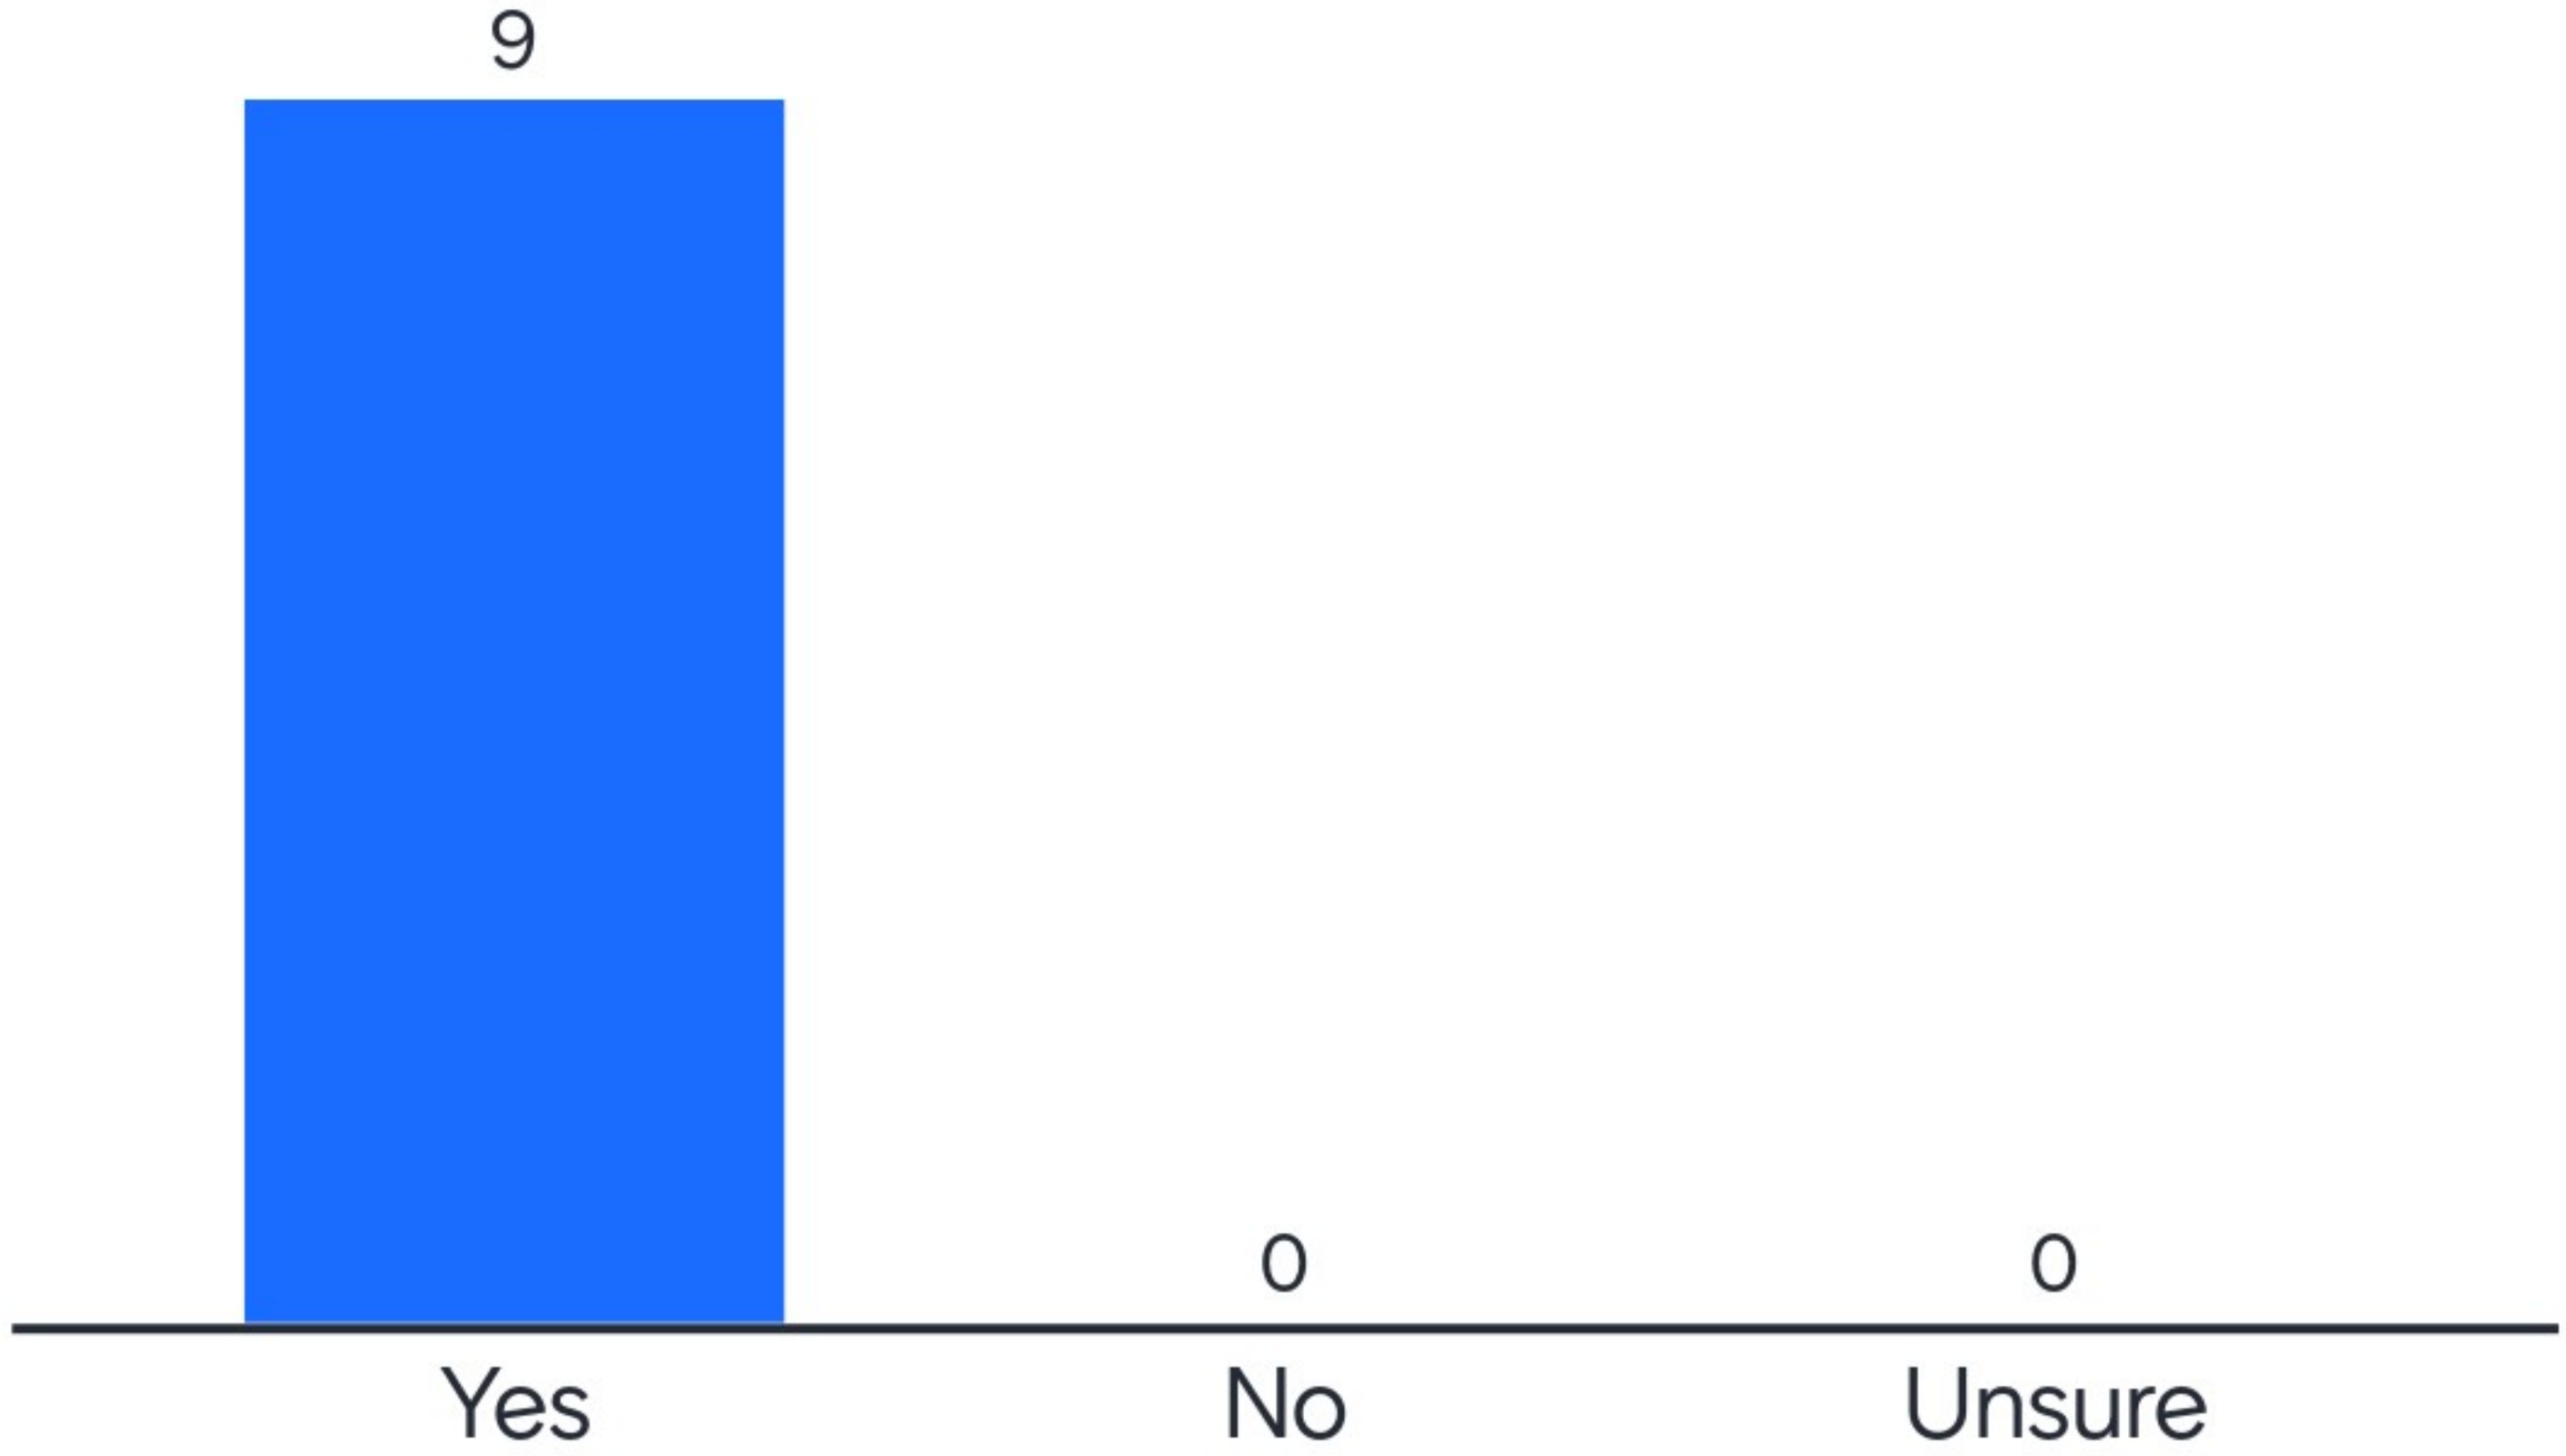

Do you plan to create e-learning support and development centres at universities in your country?

Do you plan to create an e-learning community for university members in your country?

Does the present TF-EDU strategy and roadmap follow the right direction?

Is there anything missing you find important on the TF-EDU strategy and roadmap?

No

No

Clearly identify importance of open edtech standards

No

Identify how to work with supplier community
